Description	Hex nut with an enlarged circular base flaring out from the bottom of the nut. The bearing surface of the flange is smooth.	
Applications/Advantages	Larger bearing surface will span oversized or poorly aligned holes. Flange provides a more uniform bearing-stress to clamp-force ratio than other low carbon lock nuts.	
Material	Class 8 nuts shall be made of steel which conforms to the following chemical composition-- <i>Carbon</i> : 0.58% maximum; <i>Manganese</i> : 0.25% minimum; <i>Phosphorus</i> : 0.060% maximum; <i>Sulfur</i> : 0.150% maximum.	Class 10 nuts shall be made of a steel which conforms to the following chemical composition-- <i>Carbon</i> : 0.58% maximum; <i>Manganese</i> : 0.30% minimum; <i>Phosphorus</i> : 0.048% maximum; <i>Sulfur</i> : 0.058% maximum.
Hardness	Diameters M5 through M16: Vickers HV 200 - 302 Diameter M20: Vickers HV 233 - 353	Diameters M5 through M20: Vickers HV 272 - 353
